DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 4-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims lack antecedent basis for "the first time zone". Further, the "main analogue display" is implicitly recited; however, it is not clear where such display is located with respect to the timepiece. The first time zone and main analogue display should be positively recited to clearly define the invention claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by the U.S. Patent to Pheils. The reference discloses a timepiece with hour hand 8 completing one revolution in twelve hours, disc 3 rotating about the axis of the hour hand once in twenty four hours, disc 3 defining two half disc, as seen in Fig. 1, of light and dark shade for indicating AM/PM of the time indicated by the hour hand, a minute wheel set 12,14.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4 and 5 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Dalloz in view of Pheils. The Dalloz reference discloses in Fig. 2 a timepiece with a main time display for indicating local time and a second analog display for indicating time in a second time zone in a 12 hour format, described as such in col. 1. Dalloz does not suggest an AM/PM indicator for the time displays. It would be obvious for one of ordinary skill in the art, at the time the invention was made, to provide the AM/PM indicator of the Pheils reference in one of the analog displays of Dalloz to indicate to the user this useful information of the time with respect to the 24 hour day.
